NS -

## Employee blood / body fluid exposure

### Baseline or Follow Up:

1. stamp the employee card above.
2. select the appropriate panel and collect the proper tubes.
3. label the tubes and package appropriately and then get these to the laboratory.

### Lab receiving instructions:

1. Ensure that these tests are ordered with the letters "NS" before the patient's medical record number.

NS – medical record number  
e. g. NS-99999999

### Notes:

**Before drawing lab work on  
Employee verify identification by  
obtaining photo ID**

**Place copy of Photo ID with their  
chart.**
